Responsible Retrofit for Traditional Buildings

Identifying risks, managing unintended consequences and delivering real energy savings

At-Bristol Science Centre, Anchor Rd, Harbourside, Bristol, BS1 5DB

This national conference is aimed at professionals from Local Authorities, Housing Associations and private landlords who are planning or delivering retrofit programmes.

Who should attend? Sustainability practitioners, building surveyors, engineers, asset, programme and risk managers. Conservation and planning officers, contractors, designers and supply chain associates.

Summary

Collaborating with the UK's most experienced organisations and individuals, the event will:

- 1 Identify risks and unintended consequences associated with the retrofit of traditional buildings and share best ways of managing them.
- 2 Equip delegates with the knowledge, practical resources and skills required to successfully and effectively carry out work on their traditional housing stock.
- 3 Share practical, affordable and achievable case studies.
- 4 Develop expertise and establish a practical support network.

Join us for a day of presentations, discussions, practical workshops, hands on training and networking.
